ABOUT ME

Nickname: Benji
Date of birth: 30/12/2005
Nationality: Thai

MY GOAL

As a Third-year students in Mathematics with computer science i have a basic background in mathematics, Programming and data analysis i want to gain experience from internships in data analysis and software development to apply knowledge to the real work

BACKGROUND

- King mongkut's university of technology north bangkok (KMUTNB)
- Bachelor of science Program in mathematics with computer science
- Currently studying in 3rd year (expected graduation: 2027)
- Cumulative GPA: 3.05

SKILLS

- Programming: Python / Java / C#, Data Structures, OOP
- Mathematics: Calculus, Linear Algebra, Discrete, Statistics, Vector Analysis
- Tools: SQL, Git/GitHub
- Soft Skills: Logical Thinking, Problem Solving, Good Teamwork, Fast learner

LANGUAGE SKILLS

- Thai: Native
- English: B2-C1
- Russian: A2

EXPERIENCE AND PROJECTS

Restaurants system

Role: Database Developer
since 2026

- Collaborated within a 5-member student to develop a Sushi Restaurant Management System for a Database Management System course, taking primary responsibility for the database architecture.
- Designed database tables and entity-relationship models to manage menus, customers, and order data.
- Executed SQL queries for core CRUD operations (Create, Read, Update, Delete) and integrated the database with the application using SQL Server.

Cat Supply Store Management System

Role: Database Developer
since 2026

- Collaborated within a 6-member team to develop a retail management system for a Database Programming course, taking primary responsibility for the database architecture.
- Designed relational database tables and entity-relationship models for products, categories, customers, orders, and inventory.
- Authored SQL queries and integrated the database with the application using SQL Server.
